# <u>Design and Technology Progress</u>

<u>Designing</u>	<u>Key Stage 1</u>	Key Stage 2
Understanding	Across KS1 pupils should:	Across KS2 pupils should:
contexts, users	work confidently within a range of	work confidently within a range of contexts, such as the home, school,
and purposes	contexts, such as imaginary, story-	leisure, culture, enterprise, industry and the wider environment
	based, home, school, gardens,	describe the purpose of their products
	playgrounds, local community, industry and the wider environment	indicate the design features of their products that will appeal to
	<ul> <li>state what products they are</li> </ul>	intended users
	designing and making	explain how particular parts of their products work
	say whether their products are for	In early KS2 pupils should also:
	themselves or other users	• gather information about the needs and wants of particular individuals
	describe what their products are for	and groups
	say how their products will work	develop their own design criteria and use these to inform their ideas
	say how they will make their	In late KS2 pupils should also:
	products suitable for their intended	carry out research, using surveys, interviews, questionnaires and web-
	users	based resources
	<ul> <li>use simple design criteria to help</li> </ul>	• identify the needs, wants, preferences and values of particular
	develop their ideas	individuals and groups
		develop a simple design specification to guide their thinking
Generating,	Across KS1 pupils should:	Across KS2 pupils should:
developing,	generate ideas by drawing on their	share and clarify ideas through discussion
modelling and	own experiences	model their ideas using prototypes and pattern pieces
communicating	use knowledge of existing products to	use annotated sketches, cross-sectional drawings and exploded
ideas	help come up with ideas	diagrams to develop and
	develop and communicate ideas by  talking and demociate	communicate their ideas
	talking and drawing	use computer-aided design to develop and communicate their ideas
	<ul> <li>model ideas by exploring materials, components and</li> </ul>	In early KS2 pupils should also:
	construction kits and by making	generate realistic ideas, focusing on the needs of the user
	templates and mockups	make design decisions that take account of the availability of resources
	use information and communication	In late KS2 pupils should also:
	technology, where appropriate, to	generate innovative ideas, drawing on research
	develop and communicate their ideas	<ul> <li>make design decisions, taking account of constraints such as time,</li> </ul>
	'	resources and cost
Making	<u>Key Stage 1</u>	
	Nog Ottago I	<u>Key Stage 2</u>
Planning	Across KS1 pupils should:	Across KS2 pupils should:
		Across KS2 pupils should:  • select tools and equipment suitable for the task
	Across KS1 pupils should:  • plan by suggesting what to do next  • select from a range of tools and	Across KS2 pupils should: <ul> <li>select tools and equipment suitable for the task</li> <li>explain their choice of tools and equipment in relation to the skills and</li> </ul>
	<ul> <li>Across KS1 pupils should:</li> <li>plan by suggesting what to do next</li> <li>select from a range of tools and equipment, explaining their choices</li> </ul>	<ul> <li>Across KS2 pupils should:</li> <li>select tools and equipment suitable for the task</li> <li>explain their choice of tools and equipment in relation to the skills and techniques they will be using</li> </ul>
	Across KS1 pupils should:  • plan by suggesting what to do next  • select from a range of tools and equipment, explaining their choices  • select from a range of materials and	<ul> <li>Across KS2 pupils should:</li> <li>select tools and equipment suitable for the task</li> <li>explain their choice of tools and equipment in relation to the skills and techniques they will be using</li> <li>select materials and components suitable for the task</li> </ul>

Planning  Practical skills and	Across KS1 pupils should:  • plan by suggesting what to do next  • select from a range of tools and equipment, explaining their choices  • select from a range of materials and components according to their characteristics  Across KS1 pupils should:  • follow procedures for safety and hygiene  • use a range of materials and components, including construction materials and kits, textiles, food ingredients and mechanical components	Across KS2 pupils should:  • select tools and equipment suitable for the task  • explain their choice of tools and equipment in relation to the skills and techniques they will be using  • select materials and components suitable for the task  • explain their choice of materials and components according to functional properties and aesthetic qualities  In early KS2 pupils should also:  • order the main stages of making  In late KS2 pupils should also:  • produce appropriate lists of tools, equipment and materials that they need  • formulate step-by-step plans as a guide to making  Across KS2 pupils should:  • follow procedures for safety and hygiene  • use a wider range of materials and components than KS1, including construction materials and kits, textiles, food ingredients, mechanical components and electrical components  In early KS2 pupils should also:  • measure, mark out, cut and shape materials and components with some
Planning  Practical skills and	Across KS1 pupils should:  • plan by suggesting what to do next  • select from a range of tools and equipment, explaining their choices  • select from a range of materials and components according to their characteristics  Across KS1 pupils should:  • follow procedures for safety and hygiene  • use a range of materials and components, including construction materials and kits, textiles, food ingredients and mechanical components  • measure, mark out, cut and shape materials and components  • assemble, join and combine materials	Across KS2 pupils should:  • select tools and equipment suitable for the task  • explain their choice of tools and equipment in relation to the skills and techniques they will be using  • select materials and components suitable for the task  • explain their choice of materials and components according to functional properties and aesthetic qualities  In early KS2 pupils should also:  • order the main stages of making  In late KS2 pupils should also:  • produce appropriate lists of tools, equipment and materials that they need  • formulate step-by-step plans as a guide to making  Across KS2 pupils should:  • follow procedures for safety and hygiene  • use a wider range of materials and components than KS1, including construction materials and kits, textiles, food ingredients, mechanical components and electrical components  In early KS2 pupils should also:  • measure, mark out, cut and shape materials and components with some accuracy
Planning  Practical skills and	Across KS1 pupils should:  • plan by suggesting what to do next  • select from a range of tools and equipment, explaining their choices  • select from a range of materials and components according to their characteristics  Across KS1 pupils should:  • follow procedures for safety and hygiene  • use a range of materials and components, including construction materials and kits, textiles, food ingredients and mechanical components  • measure, mark out, cut and shape materials and components  • assemble, join and combine materials and components	Across KS2 pupils should:  select tools and equipment suitable for the task  explain their choice of tools and equipment in relation to the skills and techniques they will be using  select materials and components suitable for the task  explain their choice of materials and components according to functional properties and aesthetic qualities.  In early KS2 pupils should also:  order the main stages of making  In late KS2 pupils should also:  produce appropriate lists of tools, equipment and materials that they need  formulate step-by-step plans as a guide to making  Across KS2 pupils should:  follow procedures for safety and hygiene  use a wider range of materials and components than KS1, including construction materials and kits, textiles, food ingredients, mechanical components and electrical components  In early KS2 pupils should also:  measure, mark out, cut and shape materials and components with some accuracy  assemble, join and combine materials and components with some accuracy  apply a range of finishing techniques, including those from art and
Planning  Practical skills and	Across KS1 pupils should:  • plan by suggesting what to do next  • select from a range of tools and equipment, explaining their choices  • select from a range of materials and components according to their characteristics  Across KS1 pupils should:  • follow procedures for safety and hygiene  • use a range of materials and components, including construction materials and kits, textiles, food ingredients and mechanical components  • measure, mark out, cut and shape materials and components  • assemble, join and combine materials and components  • use finishing techniques, including	Across KS2 pupils should:  • select tools and equipment suitable for the task  • explain their choice of tools and equipment in relation to the skills and techniques they will be using  • select materials and components suitable for the task  • explain their choice of materials and components according to functional properties and aesthetic qualities  In early KS2 pupils should also:  • order the main stages of making  In late KS2 pupils should also:  • produce appropriate lists of tools, equipment and materials that they need  • formulate step-by-step plans as a guide to making  Across KS2 pupils should:  • follow procedures for safety and hygiene  • use a wider range of materials and components than KS1, including construction materials and kits, textiles, food ingredients, mechanical components and electrical components  In early KS2 pupils should also:  • measure, mark out, cut and shape materials and components with some accuracy  • assemble, join and combine materials and components with some accuracy
Planning  Practical skills and	Across KS1 pupils should:  • plan by suggesting what to do next  • select from a range of tools and equipment, explaining their choices  • select from a range of materials and components according to their characteristics  Across KS1 pupils should:  • follow procedures for safety and hygiene  • use a range of materials and components, including construction materials and kits, textiles, food ingredients and mechanical components  • measure, mark out, cut and shape materials and components  • assemble, join and combine materials and components	Across KS2 pupils should:  select tools and equipment suitable for the task  explain their choice of tools and equipment in relation to the skills and techniques they will be using  select materials and components suitable for the task  explain their choice of materials and components according to functional properties and aesthetic qualities  In early KS2 pupils should also:  order the main stages of making  In late KS2 pupils should also:  produce appropriate lists of tools, equipment and materials that they need  formulate step-by-step plans as a guide to making  Across KS2 pupils should:  follow procedures for safety and hygiene  use a wider range of materials and components than KS1, including construction materials and kits, textiles, food ingredients, mechanical components and electrical components  In early KS2 pupils should also:  measure, mark out, cut and shape materials and components with some accuracy  assemble, join and combine materials and components with some accuracy  apply a range of finishing techniques, including those from art and design, with some accuracy
Planning  Practical skills and	Across KS1 pupils should:  • plan by suggesting what to do next  • select from a range of tools and equipment, explaining their choices  • select from a range of materials and components according to their characteristics  Across KS1 pupils should:  • follow procedures for safety and hygiene  • use a range of materials and components, including construction materials and kits, textiles, food ingredients and mechanical components  • measure, mark out, cut and shape materials and components  • assemble, join and combine materials and components  • use finishing techniques, including	Across KS2 pupils should:  select tools and equipment suitable for the task  explain their choice of tools and equipment in relation to the skills and techniques they will be using  select materials and components suitable for the task  explain their choice of materials and components according to functional properties and aesthetic qualities  In early KS2 pupils should also:  order the main stages of making  In late KS2 pupils should also:  produce appropriate lists of tools, equipment and materials that they need  formulate step-by-step plans as a guide to making  Across KS2 pupils should:  follow procedures for safety and hygiene  use a wider range of materials and components than KS1, including construction materials and kits, textiles, food ingredients, mechanical components and electrical components  In early KS2 pupils should also:  measure, mark out, cut and shape materials and components with some accuracy  assemble, join and combine materials and components with some accuracy  apply a range of finishing techniques, including those from art and design, with some accuracy  In late KS2 pupils should also:
Planning  Practical skills and	Across KS1 pupils should:  • plan by suggesting what to do next  • select from a range of tools and equipment, explaining their choices  • select from a range of materials and components according to their characteristics  Across KS1 pupils should:  • follow procedures for safety and hygiene  • use a range of materials and components, including construction materials and kits, textiles, food ingredients and mechanical components  • measure, mark out, cut and shape materials and components  • assemble, join and combine materials and components  • use finishing techniques, including	Across KS2 pupils should:  select tools and equipment suitable for the task  explain their choice of tools and equipment in relation to the skills and techniques they will be using  select materials and components suitable for the task  explain their choice of materials and components according to functional properties and aesthetic qualities  In early KS2 pupils should also:  order the main stages of making  In late KS2 pupils should also:  produce appropriate lists of tools, equipment and materials that they need  formulate step-by-step plans as a guide to making  Across KS2 pupils should:  follow procedures for safety and hygiene  use a wider range of materials and components than KS1, including construction materials and kits, textiles, food ingredients, mechanical components and electrical components  In early KS2 pupils should also:  measure, mark out, cut and shape materials and components with some accuracy  assemble, join and combine materials and components with some accuracy  apply a range of finishing techniques, including those from art and design, with some accuracy  In late KS2 pupils should also:  accurately measure, mark out, cut and shape materials and components
Planning  Practical skills and	Across KS1 pupils should:  • plan by suggesting what to do next  • select from a range of tools and equipment, explaining their choices  • select from a range of materials and components according to their characteristics  Across KS1 pupils should:  • follow procedures for safety and hygiene  • use a range of materials and components, including construction materials and kits, textiles, food ingredients and mechanical components  • measure, mark out, cut and shape materials and components  • assemble, join and combine materials and components  • use finishing techniques, including	Across KS2 pupils should:  select tools and equipment suitable for the task  explain their choice of tools and equipment in relation to the skills and techniques they will be using  select materials and components suitable for the task  explain their choice of materials and components according to functional properties and aesthetic qualities  In early KS2 pupils should also:  order the main stages of making  In late KS2 pupils should also:  produce appropriate lists of tools, equipment and materials that they need  formulate step-by-step plans as a guide to making  Across KS2 pupils should:  follow procedures for safety and hygiene  use a wider range of materials and components than KS1, including construction materials and kits, textiles, food ingredients, mechanical components and electrical components  In early KS2 pupils should also:  measure, mark out, cut and shape materials and components with some accuracy  assemble, join and combine materials and components with some accuracy  apply a range of finishing techniques, including those from art and design, with some accuracy  In late KS2 pupils should also:  accurately measure, mark out, cut and shape materials and components  accurately measure, mark out, cut and shape materials and components
Planning  Practical skills and	Across KS1 pupils should:  • plan by suggesting what to do next  • select from a range of tools and equipment, explaining their choices  • select from a range of materials and components according to their characteristics  Across KS1 pupils should:  • follow procedures for safety and hygiene  • use a range of materials and components, including construction materials and kits, textiles, food ingredients and mechanical components  • measure, mark out, cut and shape materials and components  • assemble, join and combine materials and components  • use finishing techniques, including	Across KS2 pupils should:  select tools and equipment suitable for the task  explain their choice of tools and equipment in relation to the skills and techniques they will be using  select materials and components suitable for the task  explain their choice of materials and components according to functional properties and aesthetic qualities.  In early KS2 pupils should also:  order the main stages of making  In late KS2 pupils should also:  produce appropriate lists of tools, equipment and materials that they need  formulate step-by-step plans as a guide to making  Across KS2 pupils should:  follow procedures for safety and hygiene  use a wider range of materials and components than KS1, including construction materials and kits, textiles, food ingredients, mechanical components and electrical components  In early KS2 pupils should also:  measure, mark out, cut and shape materials and components with some accuracy  assemble, join and combine materials and components with some accuracy  In late KS2 pupils should also:  accurately arange of finishing techniques, including those from art and design, with some accuracy  In late KS2 pupils should also:  accurately measure, mark out, cut and shape materials and components  accurately assemble, join and combine materials and components  accurately assemble, join and combine materials and components  accurately assemble, join and combine materials and components
Planning  Practical skills and	Across KS1 pupils should:  • plan by suggesting what to do next  • select from a range of tools and equipment, explaining their choices  • select from a range of materials and components according to their characteristics  Across KS1 pupils should:  • follow procedures for safety and hygiene  • use a range of materials and components, including construction materials and kits, textiles, food ingredients and mechanical components  • measure, mark out, cut and shape materials and components  • assemble, join and combine materials and components  • use finishing techniques, including	Across KS2 pupils should:  select tools and equipment suitable for the task  explain their choice of tools and equipment in relation to the skills and techniques they will be using  select materials and components suitable for the task  explain their choice of materials and components according to functional properties and aesthetic qualities.  In early KS2 pupils should also:  order the main stages of making  In late KS2 pupils should also:  produce appropriate lists of tools, equipment and materials that they need  formulate step-by-step plans as a guide to making  Across KS2 pupils should:  follow procedures for safety and hygiene  use a wider range of materials and components than KS1, including construction materials and kits, textiles, food ingredients, mechanical components and electrical components.  In early KS2 pupils should also:  measure, mark out, cut and shape materials and components with some accuracy  assemble, join and combine materials and components with some accuracy  In late KS2 pupils should also:  accurately arange of finishing techniques, including those from art and design, with some accuracy  In late KS2 pupils should also:  accurately assemble, join and combine materials and components  accurately assemble, join and combine materials and components
Planning  Practical skills and	Across KS1 pupils should:  • plan by suggesting what to do next  • select from a range of tools and equipment, explaining their choices  • select from a range of materials and components according to their characteristics  Across KS1 pupils should:  • follow procedures for safety and hygiene  • use a range of materials and components, including construction materials and kits, textiles, food ingredients and mechanical components  • measure, mark out, cut and shape materials and components  • assemble, join and combine materials and components  • use finishing techniques, including	Across KS2 pupils should:  select tools and equipment suitable for the task  explain their choice of tools and equipment in relation to the skills and techniques they will be using  select materials and components suitable for the task  explain their choice of materials and components according to functional properties and aesthetic qualities.  In early KS2 pupils should also:  order the main stages of making  In late KS2 pupils should also:  produce appropriate lists of tools, equipment and materials that they need  formulate step-by-step plans as a guide to making  Across KS2 pupils should:  follow procedures for safety and hygiene  use a wider range of materials and components than KS1, including construction materials and kits, textiles, food ingredients, mechanical components and electrical components  In early KS2 pupils should also:  measure, mark out, cut and shape materials and components with some accuracy  assemble, join and combine materials and components with some accuracy  In late KS2 pupils should also:  accurately arange of finishing techniques, including those from art and design, with some accuracy  In late KS2 pupils should also:  accurately measure, mark out, cut and shape materials and components  accurately assemble, join and combine materials and components  accurately assemble, join and combine materials and components  accurately assemble, join and combine materials and components

<u>Evaluating</u>	<u>Key Stage 1</u>	<u>Key Stage 2</u>
Own ideas and products	Across KS1 pupils should:  talk about their design ideas and what they are making  make simple judgements about their products and ideas against design criteria  suggest how their products could be improved	<ul> <li>Across KS2 pupils should:</li> <li>identify the strengths and areas for development in their ideas and products</li> <li>consider the views of others, including intended users, to improve their work</li> <li>In early KS2 pupils should also:</li> <li>refer to their design criteria as they design and make</li> <li>use their design criteria to evaluate their completed products</li> </ul>
		<ul> <li>In late KS2 pupils should also:</li> <li>critically evaluate the quality of the design, manufacture and fitness for purpose of their products as they design and make</li> <li>evaluate their ideas and products against their original design specification</li> </ul>
Existing products	Across KS1 pupils should explore:  what products are who products are for what products are for how products work how products are used where products might be used what materials products are made from what they like and dislike about products	Across KS2 pupils should investigate and analyse:  how well products have been designed  how well products have been made  why materials have been chosen  what methods of construction have been used  how well products work  how well products achieve their purposes  how well products meet user needs and wants  In early KS2 pupils should also investigate and analyse:  who designed and made the products  where products were designed and made  when products were designed and made  whether products can be recycled or reused  In late KS2 pupils should also investigate and analyse:  how much products cost to make  how innovative products are  how sustainable the materials in products are  what impact products have beyond their intended purpose
Key events and Individuals	Not a requirement in KS1	Across KS2 pupils should know:  about inventors, designers, engineers, chefs and manufacturers who have developed ground-breaking products
Technical Knowledge		<u>Key Stage 2</u>
Making products work	Across KS1 pupils should know:      about the simple working characteristics of materials and components      about the movement of simple mechanisms such as levers, sliders, wheels and axles      how freestanding structures can be made stronger, stiffer and more stable      that a 3-D textiles product can be assembled from two identical fabric shapes      that food ingredients should be combined according to their sensory characteristics      the correct technical vocabulary for the projects they are undertaking	<ul> <li>Across KS2 pupils should know:</li> <li>how to use learning from science to help design and make products that work</li> <li>how to use learning from mathematics to help design and make products that work</li> <li>that materials have both functional properties and aesthetic qualities</li> <li>that materials can be combined and mixed to create more useful characteristics</li> <li>that mechanical and electrical systems have an input, process and output</li> <li>the correct technical vocabulary for the projects they are undertaking</li> <li>In early KS2 pupils should also know:</li> <li>how mechanical systems such as levers and linkages or pneumatic systems create movement</li> <li>how simple electrical circuits and components can be used to create functional products</li> <li>how to program a computer to control their products</li> <li>how to make strong, stiff shell structures</li> <li>that a single fabric shape can be used to make a 3D textiles product</li> <li>that food ingredients can be fresh, pre-cooked and processed</li> <li>In late KS2 pupils should also know:</li> <li>how more complex electrical circuits and components can be used to create functional products</li> <li>how more complex electrical circuits and components can be used to create functional products</li> <li>how to program a computer to monitor changes in the environment and control their products</li> <li>how to reinforce and strengthen a 3D framework</li> <li>that a 3D textiles product can be made from a combination of fabric shapes</li> <li>that a recipe can be adapted by adding or substituting one or more ingredients</li> </ul>

St. CHARLES		
<u>Cooking and</u> <u>Nutrition</u>	<u>Key Stage 1</u>	<u>Key Stage 2</u>
Where food comes from	Across KS1 pupils should know:  that all food comes from plants or animals  that food has to be farmed, grown elsewhere (e.g. home) or caught	Across KS2 pupils should know:  that food is grown (such as tomatoes, wheat and potatoes), reared (such as pigs, chickens and cattle) and caught (such as fish) in the UK, Europe and the wider world  In late KS2 pupils should also know:  that seasons may affect the food available  how food is processed into ingredients that can be eaten or used in cooking
Food preparation, cooking and nutrition	Across KS1 pupils should know:  • how to name and sort foods into the five groups in The eatwell plate  • that everyone should eat at least five portions of fruit and vegetables every day  • how to prepare simple dishes safely and hygienically, without using a heat source  • how to use techniques such as cutting, peeling and grating	<ul> <li>Across KS2 pupils should know:</li> <li>how to prepare and cook a variety of predominantly savoury dishes safely and hygienically including, where appropriate, the use of a heat source</li> <li>how to use a range of techniques such as peeling, chopping, slicing, grating, mixing, spreading, kneading and baking</li> <li>In early KS2 pupils should also know:</li> <li>that a healthy diet is made up from a variety and balance of different food and drink, as depicted in The eatwell plate</li> <li>that to be active and healthy, food and drink are needed to provide energy for the body</li> <li>In late KS2 pupils should also know:</li> <li>that recipes can be adapted to change the appearance, taste, texture and aroma</li> <li>that different food and drink contain different substances – nutrients, water and fibre – that are needed for health</li> </ul>

### Whole School Overview

Year Group	Autumn	Spring	Summer
Year 1	<b>Textiles</b> Templates & Joining	<b>Mechanisms</b> Wheels and Axels	<b>Cooking and Nutrition</b> Preparing fruit and vegetables
Year 2	<b>Mechanism</b> Sliders and Levers	<b>Structures</b> Freestanding Structures	<b>Cooking and Nutrition</b> Preparing fruit and vegetables
Year 3	<b>Structures</b> Shell Structures	<b>Cooking and Nutrition</b> Healthy and varied diet	<b>Mechanical Systems</b> Levers and Linkages
Year 4	<b>Textiles</b> 2D shapes to 3D products	Electrical Systems Simple Circuits & Switches	<b>Cooking and Nutrition</b> Healthy and varied diet
Year 5	<b>Textiles</b> Combining different fabric shapes	<b>Mechanical systems</b> Pulleys or Gears	Cooking and Nutrition Celebrating culture and seasonality
Year 6	<b>Electrical Systems</b> More Complex switches	Cooking and Nutrition Celebrating Culture and Seasonality	<b>Structures</b> Frame structures

### Year 1

E.G. glove puppets, finger pu				hniques (See 'D & T Projects on a Page' 1-2 ) puppet, simple bag, clothes for a teddy/doll, fabric placemat.

<ul> <li>Carry out research into user needs and existing products, using surveys, interviews, questionnaires and web-based resources.</li> <li>Develop a simple design specification to guide the development of their ideas and products, taking account of constraints including time, resources and cost.</li> <li>Generate, develop and mode innovative ideas, through discussion, prototypes and annotated sketches.</li> </ul>	ry out research into user s and existing products, g surveys, interviews, tionnaires and web-based urces. relop a simple design ification to guide the lopment of their ideas and ucts, taking account of traints including time, urces and cost. nerate, develop and model vative ideas, ugh discussion, prototypes  • Formulate a clear plan, including a step-by-step list of what needs to be done and lists of resources to be used. • Competently select from and use appropriate tools to accurately measure, mark out, cut, shape and join construction materials to make frameworks. • Use finishing and decorative techniques suitable for the product they are designing and making.		Investigate and evaluate a range of existing frame structures.     Critically evaluate their products against their design specification, intended user and purpose, identifying strengths and areas for development, and carrying out appropriate tests.     Research key events and individuals relevant to frame structures.		<ul> <li>Have a basic understanding of what structures are and how they can be made stronger, stiffer and more stable.</li> <li>Understand how to strengthen, stiffen and reinforce 3-D frameworks.</li> <li>Know and use technical vocabulary relevant to the project.</li> </ul>
